1 Step Detect was developed in 1996 by a group of prominent individuals with the intent of improving the quality of the on-site drug testing market. In working with the test strip manufacturers and leading experts in the substance abuse field, these individuals developed several types of instant drug test kits. By enforcing stringent quality assurance guidelines and diligent communication with the manufacturer, 1 Step Detect was able to become a significant entity in the substance abuse testing and monitoring business.

These same principles of quality and reliability have continued to be of primary concern to the management and employees of 1 Step Detect.

1 Step has continued to partner with only the highest quality test product manufacturers in the market today.

These tests were originally intended for use in substance abuse treatment centers and correctional facilities, however due to its convenience and accuracy the test is now being used far beyond the scope for which it was designed.

Our current clients now include the following:

**Educational Facilities**  
**Temporary Staffing Agencies**  
**Treatment Centers**  
**Law Enforcement Agencies**  
**Private Corporations**  
**Federal State and Local Government Agencies**

.....and the list  
continues to grow!

With nearly 25 years of experience, 1 Step Detect offers unparalleled customer service to all of our valued clients from the time the order is placed until the test is completed.
